

Transforming office productivity.

iW360
Version 4.0

you can

Canon

Streamline the way you work.

Handling hard copy and electronic documents is an integral part of office life. Working in harmony with our multifunctional devices, Canon's powerful document handling and publishing suite; iW360, makes it simpler and faster than ever. Whether you're scanning, collating, publishing or storing documents, this powerful software transforms working practices, heralding a new era in office productivity.

Combine and create stunning documents

Now you can simply combine documents and information from various sources and formats and instantly combine into a single editable file for publishing. Simply drag and drop the files you need and iW360 takes care of the rest.

Powerful "What You See Is What You Get" preview allows you to create professional-looking documents in an instant. Finishing options such as booklet printing, stapling, punching and folding are easily applied from the intuitive interface. Print settings can be saved and distributed as templates saving time and effort. You can even produce secured PDF files to ensure your information remains confidential

Fine-tune before publishing or printing

Since your files may originate from numerous sources, they may incorporate many different formatting options. This is no problem for iW360, which provides everything you need to make minor adjustments. Flexible editing tools allow you to add comments, create consistent fonts, move text around, coordinate colours, and add headers, footers and content pages.

Gather information

iW360 lets you scan documents and send a digital copy directly to a computer with a single button click. With ability to create searchable PDFs from the device, you can easily incorporate information from hard copies into your digital workflow.

Comment, Mark-up or Edit

Documents can be commented upon and marked-up as part of a proofing process. Marked-up PDF documents can be shared with colleagues for review, offering similar functionality to Adobe Acrobat™. For users without a license, comments can be embedded for viewing in Adobe Acrobat Reader or Professional. Documents can also be edited ready for publishing, new text, images and digital signatures can also be added.

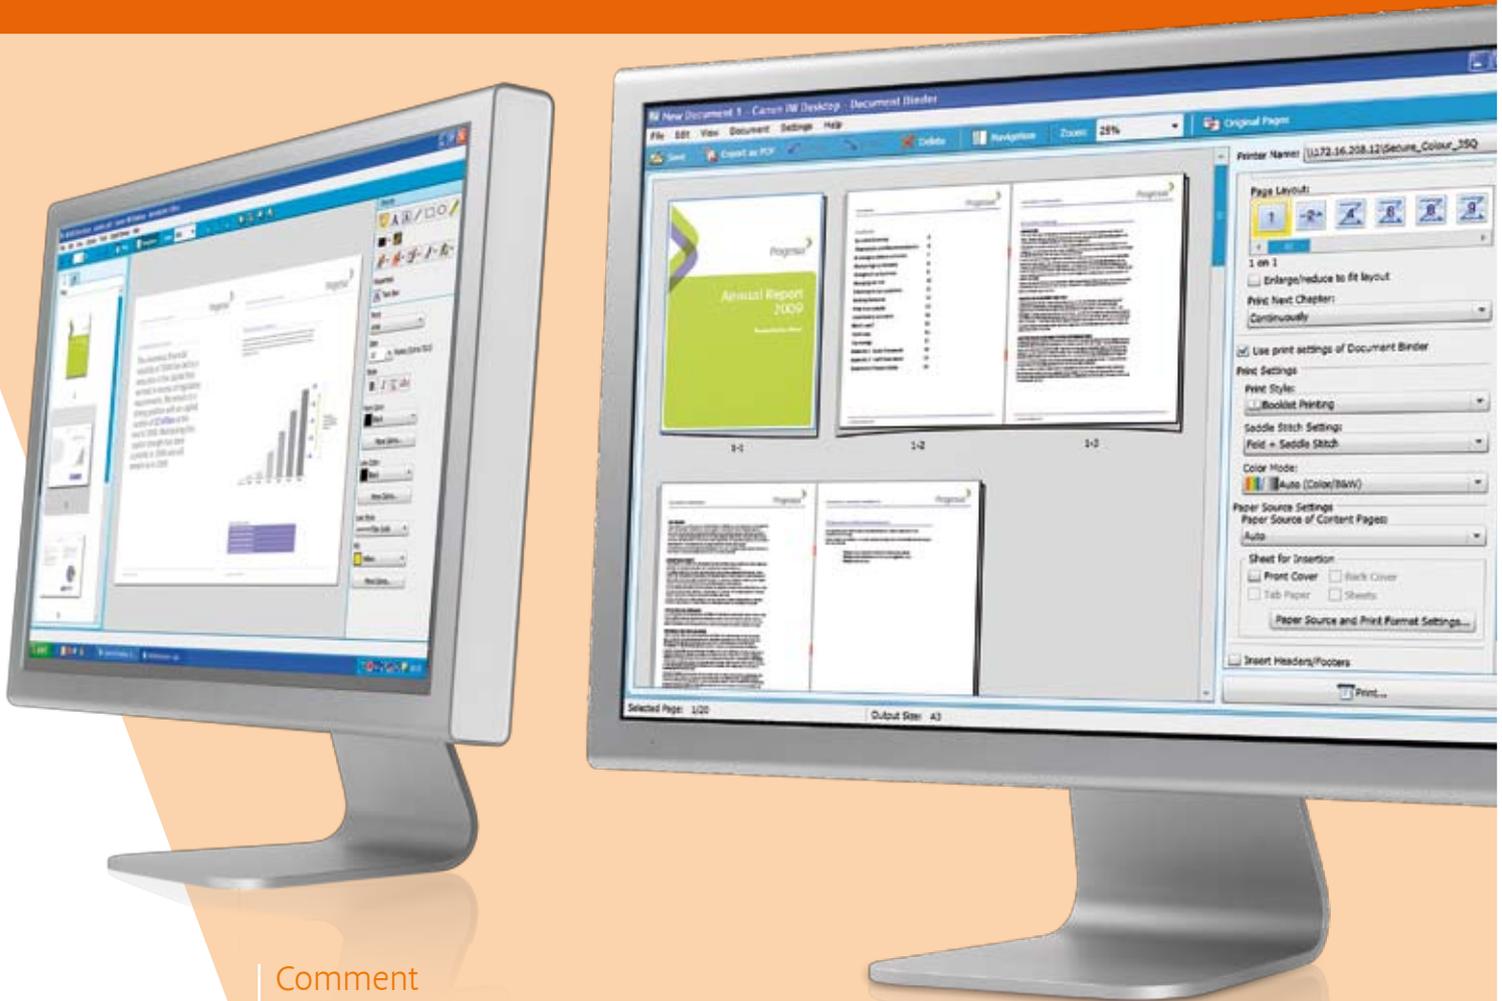

Seamless Integration

iW360 integrates seamlessly with your local network drives as well as Canon's imageRUNNER ADVANCE Series. An on-screen taskbar keeps you permanently abreast of key information, such as the status of various jobs, or when a fax has been received by the device.

Intuitive operation

At the heart of iW360 is a highly intuitive interface that's incredibly simple to navigate, placing greater power at your fingertips.

iW360 makes combining, editing and publishing professional looking documents quick and effortless.

**YOUR
PROBLEMS
SOLVED
WITH iW360**

Details of a major competitor's promotion have just arrived by email. This month's sales figures are on your PC in Excel and the latest industry forecasts sit on your desk in a PowerPoint handout. You have a meeting in 10 minutes and you want to present figures to colleagues.

It's no problem with iW360. Simply scan the handout in at your Multifunctional Printer (MFP), combine the files, make some quick tweaks and then print and create a PDF file: all in time for the meeting.

Save time with one-touch document workflows.

Every business has tasks to perform that are important but which can be extremely time-consuming. iW360 helps you transform these tasks into one-touch-button document workflows, making them quick and incredibly easy to carry out.

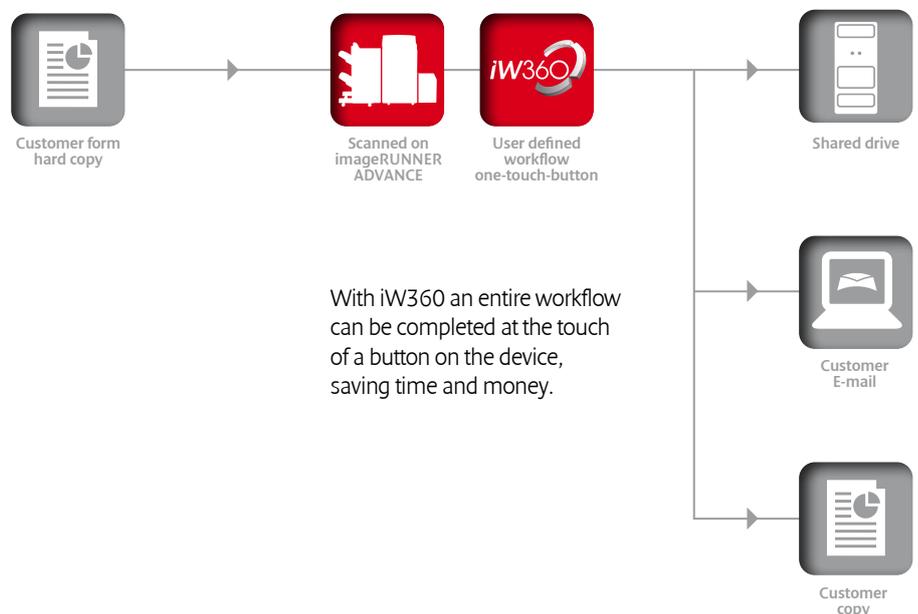

Create a workflow

Take any complex task involving hard copies, electronic documents, and your MFP and make them effortless with iW360. By simply dragging and dropping, it's relatively simple to define the workflow you want, even for the most involved tasks. Once the workflow is set up, simply give it an appropriate name and iW360 creates a button on your imageRUNNER ADVANCE. Whenever you need to perform the workflow, simply click the button and iW360 will take care of it for you.

Incorporate any function

Any workflow can combine numerous activities, as well as being made available for colleagues to use. Functions can include copy, fax, send via email, scan to FTP, scan to iW Document Server. For example, you could create a workflow that scans a critical business report and then sends it to 10 different fax numbers, 30 email addresses and prints 20 copies on your Canon MFP and stores it on the iW Document Server all at the touch of a button.

One-touch-button example workflow

iW360 helps you work smarter and improves your document communication.

YOUR PROBLEMS SOLVED WITH iW360

Imagine a branch of a national bank. To open an account the customer fills in a form. This form is then scanned on a multifunctional printer and then sent to a shared drive for processing at head office.

A copy is required for the customer, who also receives an email confirmation that the new account opening is in process.

With iW360 the entire workflow is completed at the touch of a button on the device.

Share, store and collaborate.

iW360 is an easy-to-use document management platform that enables you to store documents and collaborate with colleagues like never before.

Collaborate with colleagues

We can't always be face to face to work on a project. And continually emailing and chasing colleagues for their input is frustrating and time consuming. iW360 combined with optional iW Document Server addresses these problems by making collaborative working a simple reality.

Libraries can be set up within iW360 and all relevant documentation associated with a project is saved within. Whenever anyone updates a document - for example, updating sales figures in an Excel spreadsheet - a pop-up box notifies you of the change. Since only one person can modify a document at any one time, the most up-to-date version is always maintained.

A simple back-up utility protects your information and provides peace of mind. Furthermore, iW Document Server includes web access allowing users the flexibility to access and collaborate anywhere from an internet browser.

Store and search with ease

There's no time wasted searching for electronic documents with iW360. It's easy to set up a document structure that suits you. Electronic documents are also stored in a way that enables words or phrases within them to be searched. So, even misfiled or poorly named documents can be retrieved in seconds.

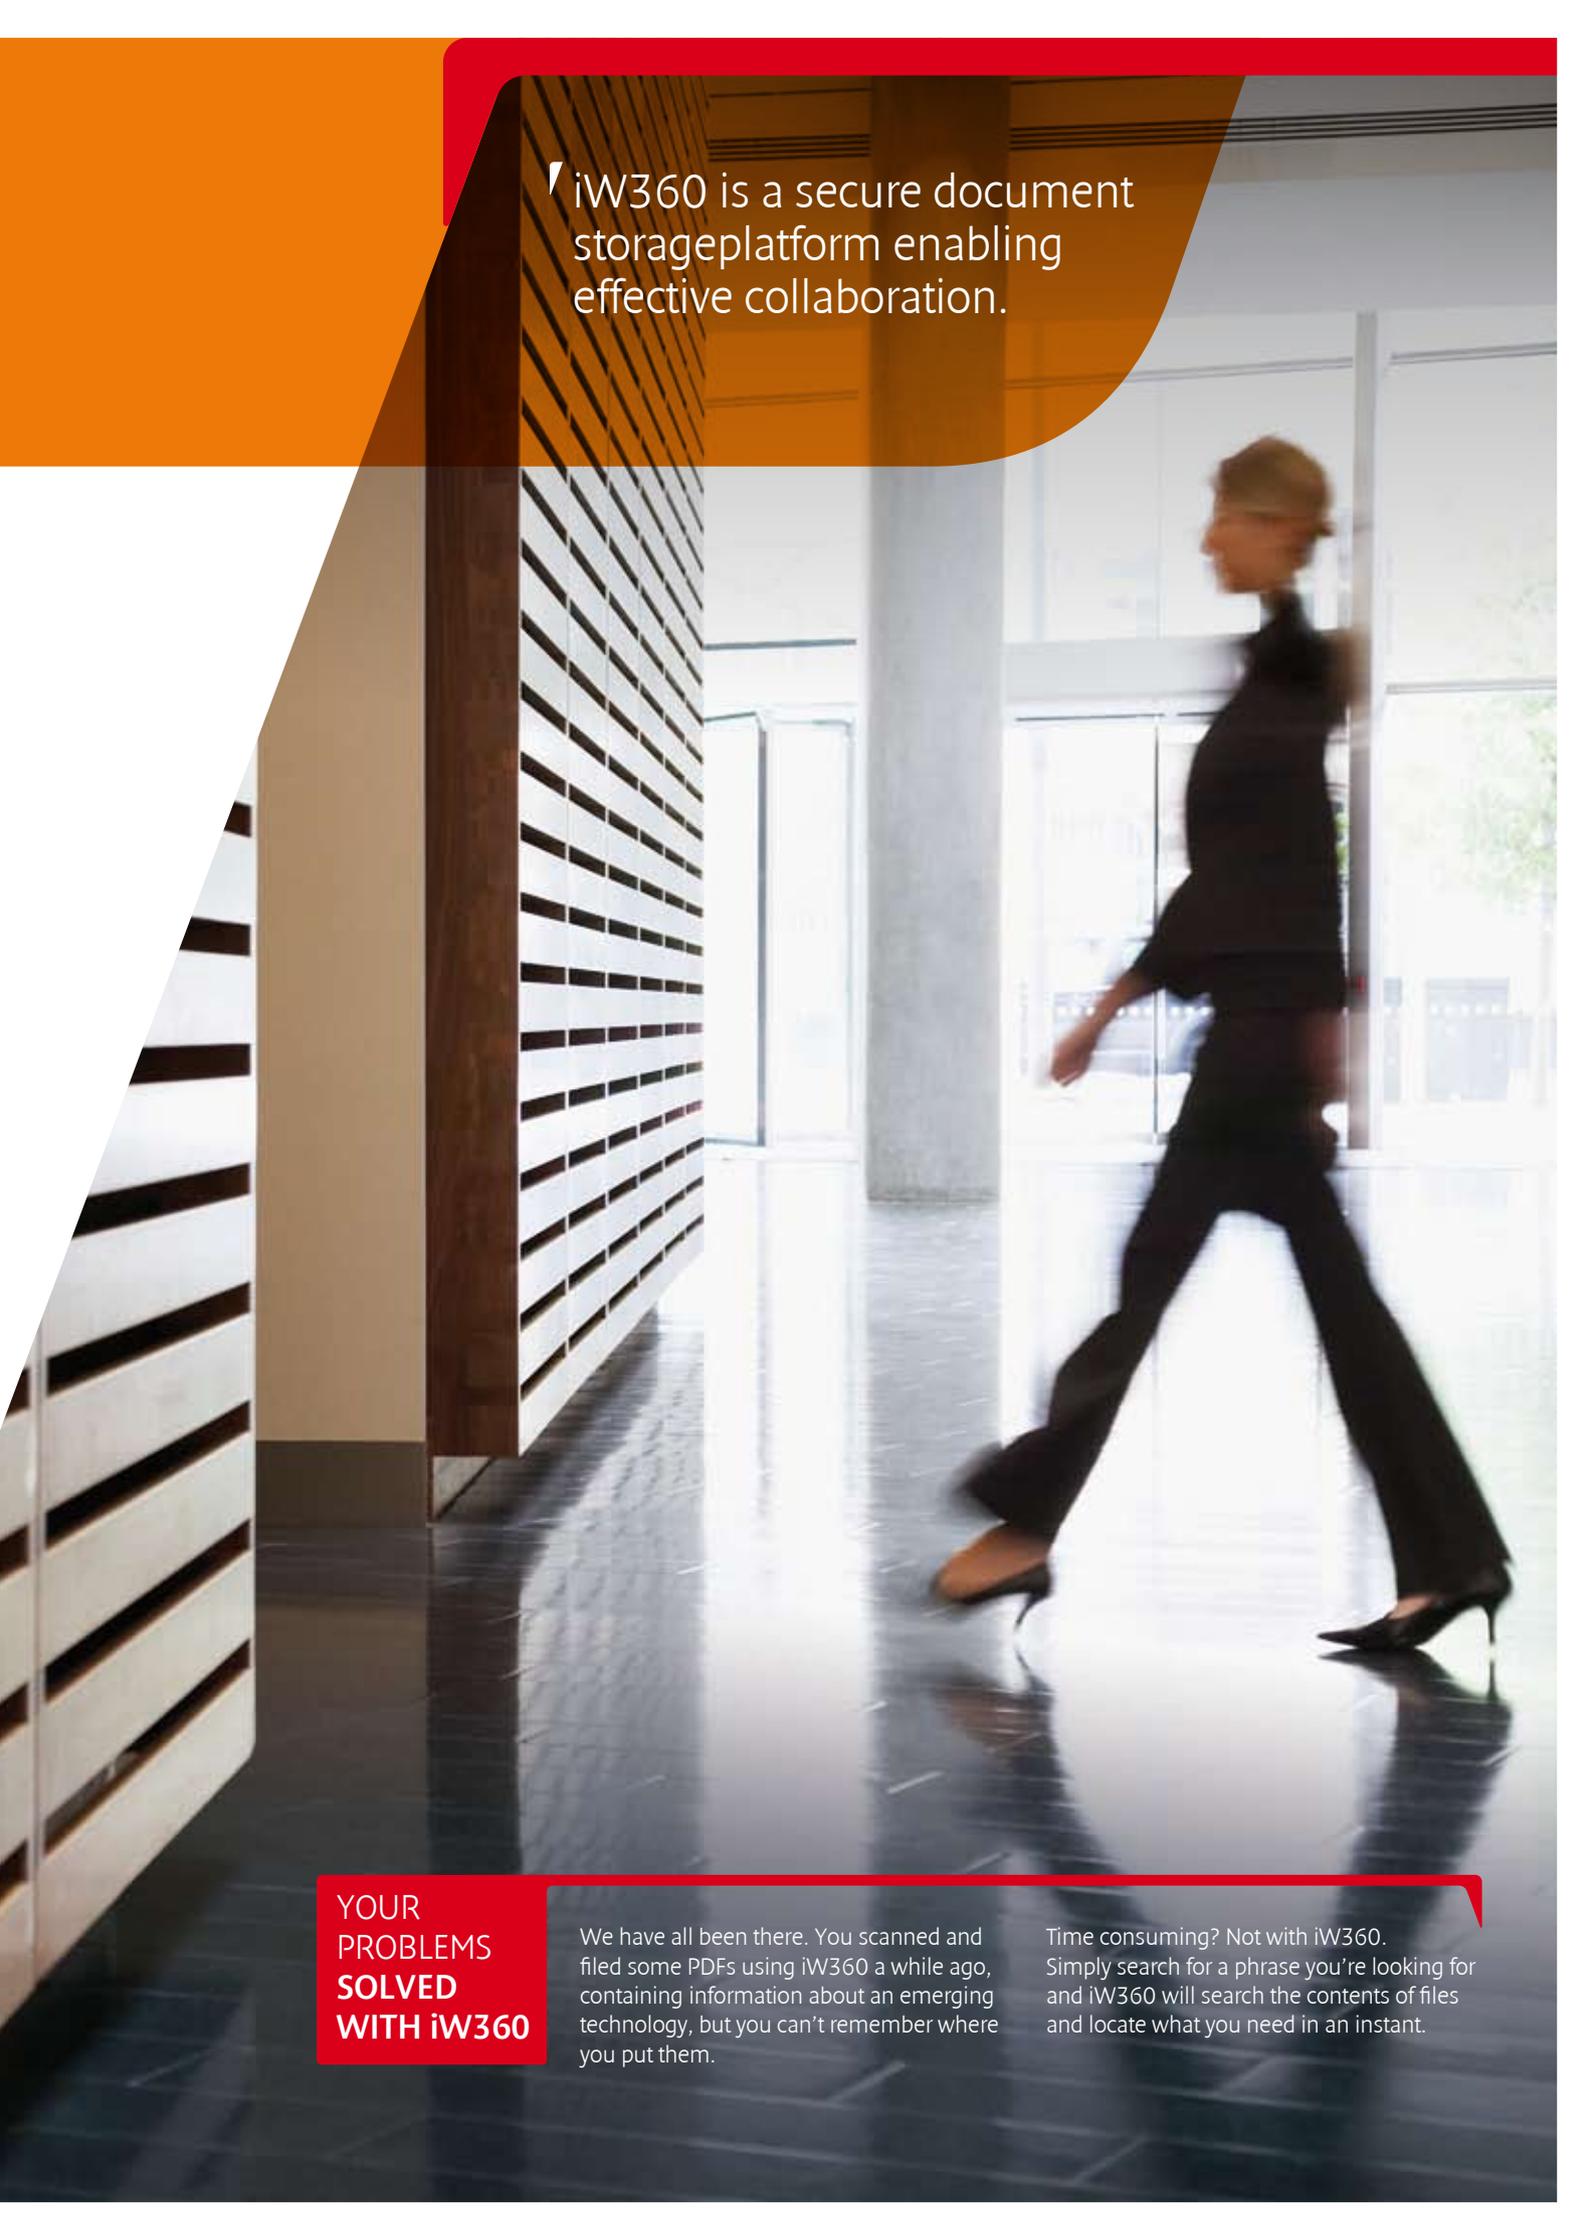

Share using fax

Many businesses still use fax as an integral part of their document workflow, for example when dealing with credit notes and signature authentication. iW360 integrates with your Canon device to help create streamlined paperless workflows.

Fax receiving - When faxes are received at the device, they can be automatically routed to iW360, split into appropriate folders and notification issued to the desired recipients.

Fax sending - iW360 integrates with your device's address book allowing faxes to be sent to numerous locations at the touch of a button. Even a cover page is generated for a time-saving, highly professional workflow.

iW360 is a secure document storage platform enabling effective collaboration.

**YOUR
PROBLEMS
SOLVED
WITH iW360**

We have all been there. You scanned and filed some PDFs using iW360 a while ago, containing information about an emerging technology, but you can't remember where you put them.

Time consuming? Not with iW360. Simply search for a phrase you're looking for and iW360 will search the contents of files and locate what you need in an instant.
