

Create, manipulate and convert PDF files.

you can

In today's fast-paced business environment, professionals don't want to waste time and money struggling with incompatible document formats or manually reproducing documents in different formats.

Canon's document manipulation solution helps you create, manipulate, and convert PDF files to enable collaboration for dramatic productivity gains and cost savings.

Create

- Generate a single PDF file from multiple documents and formats
- Automatically turn any static scanned image or PDF file into an editable Form
- Create a searchable PDF document for easy search & retrieval
- Create a password protected PDF document
- Connect with popular Enterprise Content Management solutions

Manipulate

- Edit and mark up industry standard PDF files (highlight text, add notes, embed attachments etc.)
- Automatically search, highlight and eliminate sensitive information within your document
- Automatically compare two versions of the same document and highlight the differences

Convert

- Convert PDF files into fully editable and formatted Microsoft Word files
- Create an Excel worksheet from multi page PDF files
- Convert a PDF file into an audio file
- Safeguard standard application files through the use of password protected PDFs
- Transform PDFs into editable Microsoft PowerPoint files
