

## Our Data Destruction Services

We offer our customers a range of Data Destruction options including the following:

1. Free low level Data Destruction using Dban Software.
2. Fully Certified Data Destruction services from Tabernus Software.
3. Hard Disk Drive & Data Tape On Site and Off Site Datagone Degaussing Service.
4. Hard Disk Drive & Data Tape On Site and Off Site Evashred Shredding Service.

We permanently remove data from IT assets such as PCs, servers, laptops, data centre equipment, photocopiers and smartphones. Data erased by us using Tabernus Software cannot be recovered with any existing technology. The certified detailed report provided is proof of a successful data erasure. This tamper-proof and verifiable reporting is an essential part of compliance, regulatory and legal auditing requirements. A comprehensive audit trail is a critical requirement for compliance with IT security standards such as ISO27001, ISO15408, PCI and FISMA.

Tabernus is a leading international provider of certified data erasure software and hardware products used by companies of all sizes around the world to completely remove and sanitize all data from hard drive storage devices.

The failure to remove data can have far-reaching consequences. It can lead to identity theft, fines, lawsuits, or prison time not to mention the loss in business or the blow to your organisation's reputation.

The confidential and sensitive information stored on large volumes of drives poses a risk. Before those drives can be reused, recycled or donated, that data must be completely and irrevocably removed. Companies are required by law to comply with regulations to safely and completely ensure that this sensitive and confidential information not be exposed to others or they will suffer from non-compliance with these regulations.

Whether you have one drive or thousands of drives you need a certified data erasure plan. A system or service that can not only perform the data wipe process you need but be able to provide reporting and management tools so that you have the peace of mind that comes with complete confidence you're in compliance.

In 2011, the latest version of Tabernus' data erasure software, Enterprise Erase v5.3 was certified by the CESG as data erasure software. Certification is awarded when software has met all of the criteria for secure erasure of magnetic media in accordance with British Government Infosec standards. After independent testing carried out by QinetiQ, a British global defence technology company under contract to CESG, the latest version of Tabernus has been formally certified for government use to securely erase protectively marked data.

Whether you are looking to sanitize data using a US Department of Defence (DoD) hard drive wiper or for a certified data destruction service, Tabernus' products, services and expertise can tailor the right data elimination solution for your organization

### Leverage our expertise to expand your company's portfolio of services.

Tabernus is a global provider of certified data erasure software, hardware, and service solutions that completely remove all data from hard drive storage devices.

In 2011, the Communications-Electronics Security Group (CESG) which is part of the UK Government Communications Headquarters, certified the latest version of Tabernus' data erasure software, Enterprise Erase v5.3 has met all the criteria for secure erasure of magnetic media in accordance with HMG Infosec standards. Later that year Tabernus opened a London office to reach and provide customer support options for their European clients and as a result have seen an expansion of their software and service throughout Europe.

#### About Tabernus

Tabernus is a leading provider of data erasure software and hardware products used by companies of all sizes to completely remove all data from hard drive storage devices. Tabernus was established in 2002 with a specialty in enterprise hard drive testing. As data security industry grew, including end of life data security, Tabernus leveraged its core competency to expand into the emerging electronic data elimination market. Since relocating its corporate offices to Austin, Texas, Tabernus has set the benchmark for software and hardware development focused on electronic data elimination.

**2004:** Tabernus relocates company headquarters to beautiful Austin, Texas.

**2004-2008:** Tabernus develops state-of-the-art electronic data elimination software and hardware.

**2009:** Tabernus launches Enterprise Erase, a software and hardware package developed with the end user's business process in mind.

**We know hard drives.  
We know how to test them.  
We know how to erase them.**

### Eliminate your electronic data quickly and completely.

Data overwrite process configurability tailored to best work with your unique requirements, including:

1. Level of Overwrite
2. Choice of overwrite algorithm
3. Secure Erase (when applicable)
4. User input fields available for barcode or unique data input
5. Capable of erasing any drive type - SCSI, SATA, FC, SAS, ATA/IDE, SSD
6. Hard drive diagnostic test capable (SMART, Seek) available on some versions
7. User adjustable configurations via password protected screen
8. Reports generated in for easy importing into Excel, others
9. Intuitive user interface screen that displays all relevant process information

### Certifications and Approvals

Data erasure specialists at Tabernus thrive on providing customers with the highest quality products. As a result, Tabernus has obtained an array of certifications and approvals globally to endorse these principals.

### ***Communications Electronics Security Group***

Tabernus Enterprise Erase 5.3 Software is certified by the Communications Electronics Security Group (CESG). CESG protects the vital interests of the UK by providing policy and assistance on the security of communications and electronic data.

## ***Communications Electronics Security Group- Commercial Product Assurance***

Tabernus Enterprise Erase version v7.0 is certified by the Communications Electronics Security Group (CESG) Commercial Product Assurance (CPA). Commercial Product Assurance (CPA) certifies commercial security products for use by government, the wider public sector and industry. At present Tabernus is the only company within the commercial data erasure industry to hold this certification.

## ***North Atlantic Treaty Organisation***

Tabernus Enterprise Erase V7.0 Software is approved by the North Atlantic Treaty Organisation (NATO). This latest certification indicates that Tabernus Enterprise Erase V7.0 sanitises all data on a hard disk up to and including NATO CONFIDENTIAL, NATO RESTRICTED, NATO SECRET and COSMIC TOP SECRET protective markings. NATO certifies products and services as being suitable for use specifically by the Military and Government organisations within its member countries. This latest certification supersedes Tabernus NATO Approval V5.3 of 2012.

## ***The Defence INFOSEC Product Co-Operation Group UK***

Tabernus Enterprise Erase 5.3 Software is approved by the Defence INFOSEC Product Co-Operation Group UK (DIPCOG). DIPCOG is a UK Ministry of Defence forum run by a committee composed by representatives primarily from the MoD and CESG. DIPCOG approves products and services as being suitable for use specifically by the MoD.

## ***Norwegian National Security Authority***

Tabernus Enterprise Erase v5.3 is approved by Norwegian National Security Authority. NSM is a cross-sectoral professional and supervisory authority within the protective security services in Norway.

## ***USA Department of Defense***

Tabernus is approved by the USA Department of Defense (DOD). Tabernus received this approval from meeting and exceeding standards provided by the USA Department of Defense.

### ***Onsite Data Destruction Services using Datagone Degausser:***

While Tabernus specializes in the development and production of data erasure software and hardware tools, we do understand that your organization may require an expert resource to perform necessary data destruction services on site.

Perhaps you are an organization with your own team in charge of decommissioning PC's, laptops, servers and enterprise equipment, but your team may need additional resources or expertise to support certain projects. Or, perhaps, you are an asset recovery company whose major account wants special on-site data destruction service using our portable Datagone Degausser. Please see video [www.degausser.info/video/datagone.htm](http://www.degausser.info/video/datagone.htm) please do not hesitate to contact us for a quotation.

### ***Onsite Data Destruction Services using Evashred Hard Disk Drive Shredder:***

You may have a requirement to shred your hard disk drives, Data tapes, CD etc. We can offer you both on site and off site shredding service using our Evashred EV25E portable hard disk drive shredder.

### ***Use Kavanagh Recycling & Recovery For:***

1. Onsite/Offsite Data Destruction Services / Hard Drive Destruction Services
2. Asset Information Collection
3. Consulting
4. Custom IT Service Solutions

Let our team of experts provide the professional support you need to get the job done. We provide turn-key service with people, software, and equipment to tackle the most challenging projects.

### ***Secure Door to Door Logistics Process:***

The security of your Data is of paramount importance to us, we designed our process to eliminate all potential leaks. By handing every stage of the process we offer total security from collection to data destruction and recycling. With data protection legislation becoming more regulated, we can help you stay compliant and avoid data breaches.

- Secure non branded Vehicles.
- We only use our own staff, no outsourcing of any part of the process.
- Full count of equipment is carried out in conjunction with the customer as equipment is loaded onto the vehicle.
- Vehicle is never left unattended during loading or transport.
- Vehicle doors are sealed in front of customer prior to departure.
- When vehicle arrived at our facility, gates are locked at all times. Van is driven into our warehouse, shutter closed prior to unloading.
- Seals are removed from vehicle; customer may witness this process if required or photographic evidence can be taken.
- Unloading is supervised by Data Destruction manager, who counts the equipment as it is unloaded.
- All equipment is moved into a quarantine area prior to Data Destruction Process.

### ***Secure Quarantine Storage Facility:***

The Equipment awaiting Data Destruction is stored in a secure quarantine area within the warehouse.

All equipment is locked in secure cages to which only the Data Destruction manager has access. He will sign out batches of 10 at a time for Data Destruction which he supervises. Only when 10 units are returned will another 10 be released.

The returned units will have their Data Destroyed and a Certificate produced. They are all checked against the certificate that all data is removed before the hard disk is removed for shredding.
